K-80 TRAP SPECIAL
THE "HEADS UP" APPROACH TO TRAP

K-80 TRAP SPECIAL

The K-80 Trap Special is built around the proven K-80 receiver featuring a high rib and stock design. The K-80 Trap Special rib design allows for a more upright and natural head position increasing and accelerating target pick up. The Monte Carlo adjustable stock dimensions complement the high rib and the "head up" design reduces perceived recoil and minimizes neck strain.

Available as a combination with 30" * or 32" over/under barrels and the choice of 34" Unsingle or Top Single barrel, the Trap Special Combo becomes a serious competitor in all trap events. If Handicap or Singles is your specialty, the Trap Special may be purchased with a single barrel of your choice. Equally, if trap doubles are your favorite the Trap Special is available as an over/under only.

Factory set to shoot a 70%/30% pattern, Trap Special barrels come standard with choke tubes and always feature fully adjustable ribs. Fixed choked versions may be available from time to time on special request. Bottom barrel point-of-impact (POI) on the over/under is adjustable by changing the barrel hanger. Barrels can be adjusted to shoot a relatively flat 60%/40% or up to almost a full pattern high and optionally even higher with the new "Pro-Rib".**

The Monte Carlo adjustable stock features an adjustable comb designed to complement the higher rib design. Crafted from Turkish walnut with practical competition checkering and satin finish, the stock and matching # 3 forearm adds a touch of hand crafted beauty to the sturdiness of the Trap Special.

Monte Carlo adjustable stock complements the higher Trap Special rib.

Beneath the surface beats the heart of a true competitor – the legendary K-80 receiver. Designed for serious competition and built to last, precision engineering delivers confidence with each shot. With proper care and maintenance, your Krieghoff Trap Special will be a lifelong shooting companion.

The Trap Special comes standard with a light scroll engraving, adjustable comb and standard Krieghoff steel choke tubes. Upgraded options, such as Titanium choke tubes are listed in the table below. Customization can be arranged through your Krieghoff Dealer.

Favored by amateur trapsshooters, All American Captains and Hall of Famers alike, the K-80 Trap Special can evolve into the perfect gun for every level of shooter. Its perfect balance and high post rib takes the sport of traps shooting to a new level.

Contact your Krieghoff dealer today to learn more about the K-80 Trap Special and the features designed especially for you – the Traps shooter.

Over/Under barrel gives optimum field of vision for doubles

The Top Single barrel for shooters who prefer shooting singles "off the barrel".

The Unsingle barrel, for minimizing recoil and shooting singles off the head
